

Painter & Decorator (Industrial)

Certificate of Qualification 404D

"I'm proud to be able to use my attention to detail in a creative way."

Detail oriented

Good hand-eye coordination

Comfortable working at heights

Entrance Requirements

- Grade 12 Diploma preferred (Grade 10 minimum)

Did You Know?

Industrial painters often work outdoors but may work in confined spaces like the inside of a large storage tank. Those who paint building infrastructure may need to be suspended with ropes or cables.

Key Skills & Attributes

- Physical endurance, flexibility and strength
- Comfortable working on elevated work platforms and scaffolding
- Attention to detail, problem-solving and job planning
- Strong communication, reading and numeracy

Apprenticeship Program

6000 hours of on-the-job training, supplemented by three 8-week in-class technical training sessions.

Industrial painters work primarily in infrastructure, construction and manufacturing settings to apply various epoxies, urethane and other protective coatings to a variety of materials and surfaces. Being an industrial painter provides tradespeople the opportunity to work on a variety of work sites, with the opportunity to apply your unique set of skills in many settings, or to

subspecialize in one of the coating styles.
